## **DETAILED ACTION**

### **Remarks**

1. This communication is responsive to the amendment and response dated February 10, 2006. Claims 27-46 are currently pending, of which claims 40-46 are added, and claims 29, 33-34, and 39 are canceled-leaving claims 27-28, 30-32, 35-38, and 40-46 being presented for examination.

### ***Allowable Subject Matter***

2. Claims 27-28, 30-32, 35-38, and 40-46, after further reconsideration and search are deemed to contain allowable subject matters, and are allowed over the prior art.

### **Reasons for Allowance**

3. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a computer-implemented method for brush-based warping including causing reflection effects in an image.

The prior art of record, particularly, the Kroitor reference (US 5854634) teaches defining a user input specifying a movement in a graphical user interface of a brush cursor to create an animated image (see col. 6, lines 36-4); however, Kroitor fails to teach a source image being associated with a distortion vector field having a plurality of distortion vectors; and modifying the source image using a modified distortion vector field to produce a destination image having a warping effect, such that the distortion vectors in the modified distortion vector field map with source mesh point to a

corresponding destination mesh point associated with one or more pixels in the destination image. For the aforementioned reason, the limitations of claims 27-28, 30-32, 35-38, and 40-46 are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
